Tigermed

Excellence. In Every Trial.  For Every Patient.

With a broad portfolio of services and a promise of quality, from clinical development to commercialization, we are committed to moving our customers and patients through their development journey efficiently and cost-effectively.

Vaccine Clinical Trials

A leading provider of innovative clinical research solutions across the full life cycle of biopharmaceutical

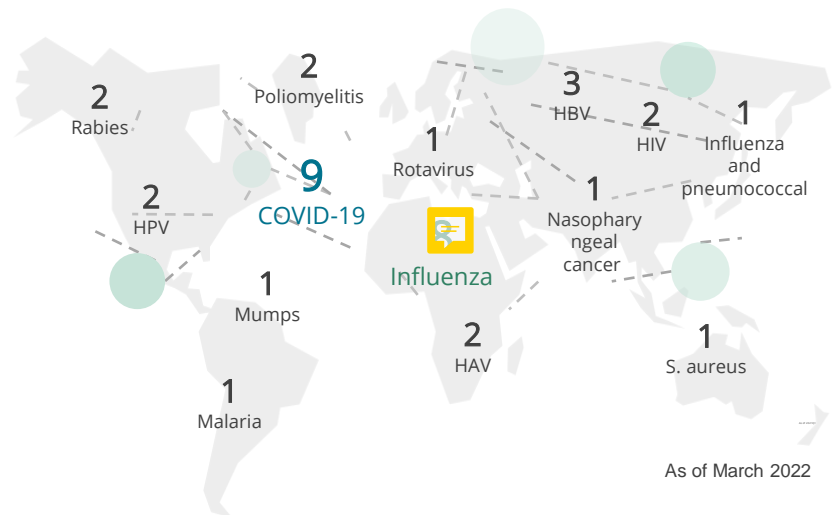

Since 2004, we have established long-term cooperative relationships with various CDCs, carrying out vaccine clinical trial projects including phase I/II/III and IV continually. We have completed more than **17** large-scale vaccine clinical projects.

In February 2021, Tigermed participated in the first international multicenter Phase III Covid-19 vaccine program in China covering Asia, Europe and Latin America, which was successfully completed and conditionally launched. The project covered more than **40,000** subjects in 5 countries.

Vaccine Clinical Trial Deliveries

Vaccine Clinical Research Process

- 1 Team Organization
- 2 Documents and SOP Preparation
